Seminar Series

Wednesday • October 2 • 10:30 am
Building 3 • Conference Room

Deploying Portable Seismic Systems: An Informal Training Session

1. Power Pack
2. EpiSensor and cable
3. RT 130
4. Ethernet cable
5. GPS and cable
6. Compact Trillium and cable
7. External battery cable
8. Vaults
9. Orange box and various hardware and parts

Come learn how to rapidly deploy in the field after a large or significant earthquake! An informal hands-on seminar where participants can get involved to whatever degree they wish. Several station set-ups will be led by experienced technicians to demonstrate the physical setup of data logger, seismic sensors, GPS, and telemetry, followed by programming of the data logger via Itouch with Reftek software interface. Also, we'll have a NetQuake setup.
